Firefly Journey

Step into Nature's Light as It Unfolds in the Dark

In the quiet northern villages of Bali, local communities are dedicating their land, time, and energy to protect the enchanting kunang-kunang—fireflies that once lit up the night skies.

By collaborating with nearby farmers to promote organic, chemical-free practices, they're creating a healthier environment where fireflies and other wildlife can thrive. But their efforts go beyond farming: community members are also studying fireflies up close—learning about their species, life cycle, and behavior through direct observation and simple lab work.

Be part of this heartwarming effort to bring fireflies back to a thriving environment. Together with local families, we can help their magical glow light up the night—for the future.

Journey Highlights

- Traditional Balinese House to start your authentic cultural journey
- Sustainable Foraging to learn how to ethically gather ingredients from nature
- Cooking Experience to prepare traditional dishes with fresh, local ingredients
- Fireflies Edu-Tour to explore the magical world of fireflies
- Dinner to enjoy a meal made from your foraged ingredients
